

**CASINO  
GRANVIA**  
MADRID

Located in an Art Deco palace from 1924, the Casino Gran Vía occupies one of the most outstanding buildings on Madrid's Gran Vía, an architectural gem.

Closely linked to social and cultural life since its origins, the former headquarters of the Círculo Mercantil e Industrial de Madrid has more than 4,500 m<sup>2</sup> spread over its 6 floors to offer a unique experience and a wide range of leisure, events, gastronomy and accommodation.

## AN ART DECO PALACE IN THE HEART OF MADRID

In 1918 the architects and brothers Joaquín and Luis Sainz de los Terreros Gómez won the public tender that the Unión Mercantil Industrial had called for the construction of its new headquarters on Gran Vía.

Its first three floors are connected by an imposing two-tone marble staircase and presided over by a hand-painted mosaic stained glass window by the well-known French firm Maumejean.

An Art Deco palace in the heart of Madrid to enjoy a unique experience where leisure, gastronomy and emotions are protagonists.

WELCOME

# EL VITRAL

The height of the three floors that make up the Atrium allows you to enjoy the beauty of the whole, spectacularly illuminated by natural light that passes through beautiful hand-painted stained-glass windows, by the prestigious Maumejean house.

This stained glass window allows the entry of light from the outside and covers it with the brilliance of these small colored crystals. Bright, colorful and majestic, it creates the ideal atmosphere to have a fun time at the Casino.

EL VITRAL

# EL ATRIO

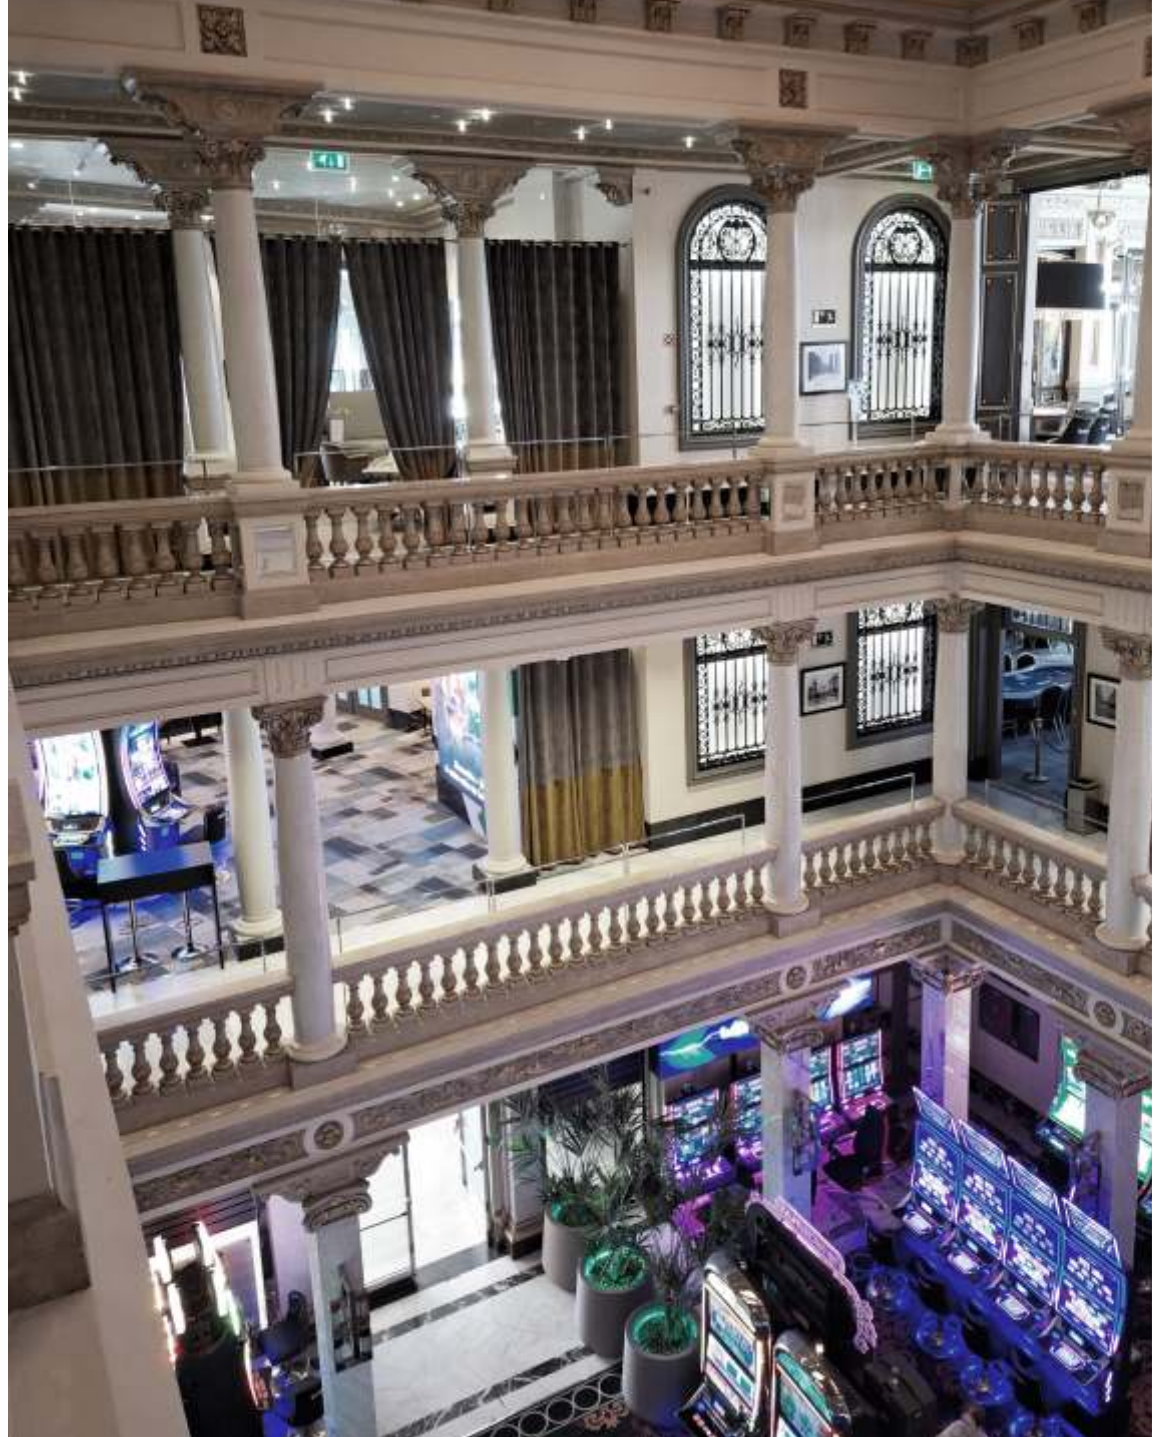

The Atrium of Casino Gran Vía is the porticoed patio that is located in the central nucleus of the building and which is accessed through the great Renaissance-style central hall. It is one of the most characteristic spaces of this beautiful palace, presiding over the access to the upper rooms of the Casino.

It has a rectangular shape and three heights, relating all the public floors of the building. It is located around the hall, and forms perimeter corridors and porticoes with stone columns and capitals painted with gold leaf.

The balustrade is articulated through these three sections and separated from each other by four small pillars and two large pillars at the foot of the stairs.

The honor staircase, built in natural alabaster with a black marble plinth, starts from the floor of the interior patio and runs through the three ascending sections until giving access to the first floor.

The stair railing, with the same characteristics as the rest of the patio, is topped at its start with two marble vases, forming a bronze lamp.

EL ATRIO

# SALÓN REAL

With a capacity of 260 m2, this spectacular ballroom looks like something out of a fairy tale. A room notable for its ornamental and architectural richness.

The composition of the room runs around four windows, three doors and striking frescoes on the ceiling. The original tapestries and wallpapers that decorate its walls have been kept intact. Access to the Hall is through the main door that connects the Royal Hall with the central Atrium.

The Royal Room has an original solid wood plank floor on which a large carpet with butterfly motifs has been placed. On the walls and ceilings, the original decoration based on stone, plaster moldings and fabrics on the walls has been maintained.

The upper balconies deserve special mention, where guests used to watch the dance performances.

SALÓN REAL

# GASTRONOMY

Casino Gran Vía has been designed to offer a complete experience of sensations that go far beyond gambling, offering a wide variety of restaurant spaces that combine a wide range of perfectly differentiated options and in which any visitor will feel in a unique atmosphere. which, at the very least, will encourage them to repeat the experience.

The Círculo Mercantil restaurant, along with other spaces such as the Private Room and the Baccarat Cocktail Bar, make up a select and distinguished offering, aimed at satisfying the most demanding palates.
